

Ever since Sequence pumps were launched they have been the leader in High Efficiency and Performance, Running on a Baldor Motor the sequence pumps are the Rolls-Royce of the Pump world...

Through innovative research and design Sequence pumps have been developed to deliver substantial flow rates at comparatively low wattages, being very economical for powerful pumps.

The Sequence centrifugal pumps are designed and built to meet the special needs of ponds, waterscapes and aquaculture. Buying "quality" really pays. Not only do you get years of dependable service, but you enjoy tremendous savings on your electricity bill, every month.

These are the work horses of the industry. They provide tremendous flow rates, with enough pressure (head) to handle the requirements of most systems with biological filters and moderate height waterfalls. They are also used extensively for the transfer and re-circulation requirements of filtration systems, water features, streams, fountains and aquaculture..

The full new range of Sequence pump are now available and are all marinised so can be used with salt water and freshwater...also the new range of Sequence pumps now carry a 3 year guarantee....
